WHAT WE BELIEVE

Rape and sexual abuse are a violation of self, and an integral part of healing is piecing this together within therapy.

A key part of this is building a safe, secure relationship with your therapist.

OUR THERAPISTS

All our qualified therapists have received additional specialist training and are members of appropriate and recognised professional bodies.

We adhere to the ethical framework of the relevant governing bodies within psychotherapy and counselling, we are also BACP accredited.

Our student therapists are selected from many applications each year and clients have a choice whether they wish to work with them.

We recognise clients as individuals and therefore tailor the counselling to client's needs.
